PROFESSIONAL SUMMARY

Learning technologist with 7+ years in eLearning design, SCORM development, and LMS integration in K-12 and corporate training. Leading a team of 8 that has shipped 100+ SCORM 1.2 modules for a blended-learning product company. I handle everything from storyboard coordination to Storyline 360 builds, SCORM/xAPI packaging, and testing on the company's LMS. Built a custom post-publish script that cut package modification and testing from 4 hours to 10 minutes. Have localized courses into 7 languages in previous roles. On the side, I run a self-hosted Moodle and cloud server as personal projects to keep my technical skills sharp.

CORE COMPETENCIES

Instructional Design (ADDIE, Bloom's Taxonomy) | SCORM 1.2 & xAPI Compliance | LMS Testing & Content Deployment | AI-Assisted Content Development | Team Leadership & Stakeholder Management | Storyboarding & High-Level Design (HLD) | Blended Learning Design | Quality Assurance & Review Workflows | Agile Project Management | Multilingual Localization & Accessibility (WCAG) | Responsive eLearning Design

TECHNICAL SKILLS

Authoring: Articulate Storyline 360

Standards: SCORM 1.2, SCORM 2004 (familiar), xAPI (Tin Can API), AICC, WCAG 2.1

LMS: Moodle (self-hosted), proprietary LMS platforms

Design & Media: Adobe Illustrator, Photoshop, Figma, PowerPoint

AI Tools: HeyGen (AI video), ElevenLabs (voice), Suno (music), NotebookLM, Gemini, Claude Code

Development: JavaScript, HTML/CSS, SCORM API integration

Infrastructure: Oracle Cloud, Linux, nginx, Docker

PROFESSIONAL EXPERIENCE

Kidvento (Ullipsu), SCORM Team Lead (Functional Manager)

Mysore, India | Jan 2025 – Present

- Lead a team of 8 (4 developers + 4 interns) that has shipped 100+ SCORM 1.2 packages for Ullipsu's K-12 and supplementary education products.
- Convert storyboard blueprints into interactive Storyline 360 modules with assessments, coordinating daily with the Storyboard Department.
- Built a custom post-publish script that auto-backs up packages to cloud storage and NAS, and makes them compatible with the LMS — took the process from 4 hours of manual modification and testing down to 10 minutes, removing the manual error factor.
- Use HeyGen to generate AI video and voiceovers for globalizing existing course content — removes the need to re-record in multiple languages, cutting production timelines and cost. Use Suno for copyright-free background music and NotebookLM for content research and analysis.
- Test every SCORM package on the company's in-house LMS before release. Run QA reviews, coach the team on packaging standards, and verify WCAG accessibility compliance in Storyline builds.
- Manage team workload planning with mitigation plans for delivery risks. Work with product and engineering to review completion data and decide what courses need reworking.
- Maintain version control through structured naming conventions and automated cloud backup scripts.

Learning Owl, Team Lead – eLearning Design & Development

Dombivli, India | Jan 2023 – Dec 2024

- Handled design and development of client eLearning projects from start to finish — scope, timelines, budgets, several running at once.
- Led a storyboard and development team; set up review checkpoints that cut down rework and got more modules approved on first pass.

- Checked every Storyline deliverable and graphic asset to make sure it matched brand guidelines and actually hit the learning goals before going to the client.
- Managed localization of courses into Hindi, Tamil, Kannada, Punjabi, Gujarati, Arabic, and Urdu.
- Filled in as instructional designer, graphic designer, or developer whenever deadlines needed it — no project missed a delivery date.

Learning Lozix, eLearning Developer / Graphic Designer

Dombivli, India | 2019 – 2022

- Made 300+ interactive quizzes, simulations, and K-12 activities built to Balbharati curriculum standards in Storyline 360.
- Built corporate training modules with branching scenarios and knowledge checks, all tracked through SCORM.
- Coordinated localization into Hindi, Tamil, Kannada, Punjabi, Gujarati, Arabic, and Urdu.
- Made training videos and packaged everything as SCORM modules for LMS deployment.

Lionbridge, Localization Integrator (Contract)

Airoli, India | 2018

- Localized eLearning courses for large enterprise clients, working with senior designers and localization engineers.
- Checked translations for accuracy and cultural relevance before release.

PROJECTS

Cloud-Hosted eLearning Test Environment — Personal Project

Oracle Cloud Infrastructure | 2024 – Present

- Set up an Oracle Cloud VPS (Always Free Tier) on Ubuntu with nginx, Docker, and iptables. Installed a self-hosted Moodle instance for SCORM package testing.
- Currently getting TRAX LRS running on the same server for xAPI statement storage and learning analytics.
- Use it as a testing sandbox to try out deployments and debug LMS issues without touching production.

SCORM/xAPI JavaScript Development — Personal Project

Self-Directed | 2024 – Present

- Learning JavaScript for SCORM 1.2 API communication and xAPI tracking, using Claude Code as an AI-assisted development tool.
- Use browser dev tools to inspect and troubleshoot SCORM data exchange with the LMS.

EDUCATION

Bachelor of Computer Animation — Dr. Babasaheb Ambedkar University

Ahmedabad, India | May 2015

LANGUAGES

English, Hindi, Gujarati, Marathi
